SPARKLE HENDERSON

Jacksonville, FL
424.355.6997 | sparkle.puroiafinancial@gmail.com

SENIOR SYSTEMS ENGINEER | CLOUD ENGINEER | CYBERSECURITY ENGINEER | ITIL PROCESS LEADER

PROFESSIONAL SUMMARY

Senior Systems, Cloud, and Cybersecurity Engineer with 10+ years of experience delivering enterprise infrastructure, security, and IT service management solutions across U.S. Government, Department of Defense, and commercial environments.

CORE COMPETENCIES

- Microsoft 365 (Exchange, Teams, SharePoint, OneDrive, Intune)
- Azure Cloud (VMs, Networking, IAM, Monitoring, Security)
- Entra ID / Azure AD (SSO, MFA, Conditional Access, RBAC)
- Cisco Networking (Routers, Switches, Firewalls, VPNs)
- ServiceNow | BMC Remedy ITSM | ITIL Framework
- Systems Integration & Enterprise Architecture
- Cybersecurity & Vulnerability Management
- Identity & Access Management (IAM)
- Cloud Migration & Tenant-to-Tenant Transitions
- System Upgrades, Implementation & Optimization
- Training Development & Technical Documentation
- Web Technologies: HTML, CSS, JavaScript, React
- PowerShell | SQL | Unix/Linux | Shell Scripting
- Disaster Recovery & Business Continuity

PROFESSIONAL EXPERIENCE

Senior Systems Analyst / IT Consultant -- Government/Commercial Contracting

2019-Present

Enterprise Systems Consulting & Data Engineering

- Lead enterprise system analysis, integration, and optimization initiatives across financial and operational platforms
- Designed and implemented custom dashboards and reporting solutions, improving executive decision-making visibility
- Developed data-driven automation processes, reducing manual reporting efforts and improving data accuracy

Systems Integration & Application Development

- Designed and deployed custom web-based tools using JavaScript, CSS, and React, enhancing user interaction and reporting capabilities
- Integrated multiple systems and databases, improving workflow efficiency and data exchange
- Provided consulting services on system modernization, scalability, and performance tuning

Process Improvement & IT Strategy

- Identified inefficiencies and implemented technology-driven solutions improving workflows and operational performance
- Supported compliance initiatives through improved system controls and audit readiness
- Delivered technical documentation, training materials, and client workshops

---

U.S. ARMY Fort Huachuca — ITIL Remedy Lead / Systems Analyst III

2017-2019

- Provided **primary oversight of technical support operations**, leading on-site and remote teams delivering enterprise IT support across mission-critical environments
- Managed and maintained a **$10M BMC Remedy ITSM platform and Atrium CMDB**, ensuring system performance, data integrity, and operational reliability
- Led **enterprise system upgrade and implementation of the BMC ITSM platform**, improving scalability, performance, and service delivery capabilities
- Spearheaded full adoption of **ITIL frameworks**, implementing Incident, Problem, Change, Asset, and Configuration Management processes to streamline operations
- Designed and implemented **Service Desk standards aligned with ITIL best practices**, improving ticket resolution efficiency and service consistency
- Directed **Configuration and Asset Management program development**, enhancing visibility, control, and lifecycle management of IT assets
- Standardized enterprise hardware and imaging processes, reducing complexity and achieving **~$250K annual cost savings**
- Developed and enforced **enterprise system standards, process documentation, and workflow procedures**, improving operational efficiency and consistency
- Led **process improvement initiatives for system imaging and deployment**, enabling faster provisioning and reduced support overhead
- Managed and supported **data analysis, reporting, and metrics development**, providing actionable insights into system performance and service delivery

- Established and managed **ITIL-based Service Level Agreements (SLAs)** between Army stakeholders, vendors, and IT support teams
- Supervised reporting initiatives including **data mining, KPI tracking, and performance metrics**, supporting leadership decision-making
- Delivered **100% customer satisfaction excellence (5.0/5.0 rating)** through improved service delivery and stakeholder engagement
- Provided **cross-functional leadership and coordination** between technical teams, vendors, and government stakeholders

---

U.S. AIR FORCE Langley Air Force Base — ITIL Remedy Subject Matter Expert (SME)

2014-2017

- Served as a **Tier 2 Technical Subject Matter Expert (SME)** for the AOC ITSM Remedy Enterprise platform, supporting global operations including maintenance, incident management, outage tracking, and deficiency reporting across multiple environments
- Provided **multi-tier application support (Tier 1 & Tier 2)** for ITSM Remedy, ensuring system availability, performance, and data integrity across enterprise systems
- Managed **centralized data administration**, including user account provisioning, group configurations, categorization structures, and system data governance across all environments
- Acted as a **primary liaison between Tier 0 operational sites, Tier 2 providers, and third-party vendors**, ensuring coordination during both scheduled and unscheduled system outages
- Led **incident communication efforts**, preparing and distributing system status updates, outage notifications, and stakeholder communications across global teams
- Coordinated and supported **User Acceptance Testing (UAT) environments**, ensuring readiness for system upgrades, enhancements, and deployments
- Conducted **pre-production testing and validation**, collaborating with developers to support system upgrades, patches, and customizations within the Remedy platform
- Produced and delivered **monthly performance metrics, system reports, and operational analytics** to government stakeholders
- Developed and maintained **knowledge base documentation, training materials, and self-service content**, improving user adoption and reducing support requests
- Generated **ad hoc reporting and data analysis** to support mission-critical decision-making and operational visibility
- Contributed to **continuous system improvement initiatives**, enhancing ITSM workflows, data accuracy, and service delivery efficiency

---

U.S. NAVY — Systems Integration Lead / Systems Engineer / Network Engineer

2004-2013

Enterprise Systems Integration & Implementation

- Led enterprise-wide implementation of ITSM platforms (TMS / NMS systems) supporting global Navy operations
- Managed creation and administration of 5,000+ user accounts, enforcing identity and access management policies
- Directed system upgrades, integrations, and implementations across mission-critical systems
- Designed and deployed centralized service desk architecture improving operational efficiency

Systems Engineering & Infrastructure

- Designed and implemented LAN/WAN networks, firewalls, VPNs, and secure communications systems
- Performed system upgrades, patching, and vulnerability remediation improving system security
- Implemented disaster recovery strategies achieving 98% uptime across enterprise systems
- Automated monitoring and reporting processes using Unix scripting and SQL

Cybersecurity & Network Engineering

- Managed Cisco routers, switches, firewalls, and VPN infrastructure
- Identified and mitigated system vulnerabilities, improving overall security posture
- Implemented network security controls and access management strategies

Training, Documentation & Consulting

- Developed and delivered ITIL-based training programs for 400+ personnel
- Created SOPs, process flows, and technical documentation for enterprise systems
- Provided consulting to leadership on system performance, scalability, and security improvements

Secure Communications Leadership

- Supervised operations supporting 3,000+ secure communication circuits across DoD networks
- Managed NIPR, SIPR, JWICS, VOIP, and VTC systems
- Led incident response and restoration for high-priority communication systems

---

ENTERPRISE CLOUD & MODERN WORK PROJECT EXPERIENCE

Microsoft 365 & Exchange Migration Projects

- Supported enterprise Exchange migrations to Microsoft 365 environments
- Assisted in tenant-to-tenant migrations ensuring secure data transfer
- Configured mail flow, security policies, and compliance controls

Azure Cloud & Identity Engineering

- Deployed and managed Azure virtual machines, networking, and storage

- Implemented Entra ID identity solutions including MFA and Conditional Access
- Supported SSO integrations and enterprise application onboarding

Security & Compliance

- Implemented Microsoft Defender security solutions across enterprise environments
- Applied Zero Trust security principles to enhance access control
- Supported compliance initiatives using Microsoft Purview (DLP, retention policies)

Endpoint Management

- Managed Intune device compliance and endpoint security policies
- Supported enterprise mobile and device management strategies

---

TECHNICAL ENVIRONMENT

Microsoft 365, Azure, Entra ID, Exchange, SharePoint, Teams, OneDrive, Intune
Cisco Networking, VPNs, Firewalls, LAN/WAN
ServiceNow, BMC Remedy ITSM, CMDB
Windows Server, Active Directory, Linux/Unix
SQL, PowerShell, Shell Scripting
HTML, CSS, JavaScript, React

EDUCATION & CERTIFICATIONS

- Bachelor of Science – Business Administration (IT Management Concentration)
- ITIL Foundation Certified
- CompTIA Security+
- CCNA (Applied)
- CISSP (Applied)
- BMC Certified Professional
